

Genasys for Manufacturing

Keep people safe and production lines running smoothly

Genasys Protect enables **rapid notification** to employees, contractors, suppliers, and everyone onsite, for both critical alerts and day-to-day communications offering a competitive edge in the world of manufacturing. **Be ready to minimize** the impact of production line disruptions and unexpected events with a tailored communications hub. In situations affecting machinery, infrastructure, the supply chain, the event to notifying those affected.

Targeted and Universal Messaging

Send notifications to individuals, groups, or targeted areas in different facilities. Use Wi-Fi auto-discovery to target areas or broadcast to everyone in the system during emergencies.

Facility-Wide Acoustic Alerts

Use Genasys Protect ACOUSTICS to broadcast live or pre-recorded voice messages over loud background noise and into buildings to notify and instruct across your facilities through failsafe audible messaging.

Employee Communications

Broadcast safety instructions through multiple channels including SMS, email, and digital signage. Use direct, real-time chat with individuals or teams for day-to-day communications.

Intelligent Zones

Intelligent zones map out your facilities to easily target buildings, critical infrastructure, and sectors both onshore and offshore. Build, edit, and act upon an intuitive map to enhance decision making.

Infrastructure Failure Alerts

Integrate external sensors to send alerts automatically when dangerous readings are detected. Set these alerts to broadcast to repair teams, people in nearby surroundings, or everyone within your facilities.

Mapping and Visualization

Eliminate confusion and enhance coordination by providing stakeholders access to a map displaying areas impacted by emergencies or other disruptions in real-time.

Public Safety Awareness

Emergencies potentially endangering people, including fires and hazardous materials incidents, require rapid communication to impacted customers, visitors, and first responders.

Employee Management

Facilitate employee management with personnel recall and automated shift assignment to reduce the necessary workload needed to keep the supply line operational.

Genasys Protect: The Communications Solution for Manufacturing

Foster seamless collaboration across various divisions, buildings, and remote manufacturing sites. Accelerate responses to critical incidents and operational challenges. Safeguard key manufacturing facilities, operational zones, and personnel through targeted multi-channel communications that broadcast vital alerts and safety instructions swiftly and efficiently.

Genasys Protect ALERT:

- » Reach everyone you need to through targeted, multi-channel, mass notification
- » Communicate quickly through Quick Launch and sensor triggered alerts
- » Send automated alerts for infrastructure and machinery failures through sensor integrations
- » Integrate databases to keep updated contact details for critical communications

Genasys Protect ACOUSTICS:

- » Send clear and intelligible voice alerts across long distances, over loud background noise and into buildings
- » Broadcast pre-recorded and live voice messages to reach employees and visitors across large campuses and multiple buildings or facilities

Genasys Protect CONNECT:

- » Collaborate and share information through real-time two-way chat
- » Maintain compliance with the strictest security requirements and regulations
- » Collaborate internally, across regions, and with external organizations

Genasys Protect EVAC:

- » Target communication across large complexes and facilities with flexible zones
- » Establish a direct connection in planning with public safety professionals
- » Provide constant situational awareness for employees, customers and visitors
- » Improve planning and reaction time through crisis, oil rig evacuation or gas leak simulations

Genasys: Global Provider of Protective Communications Solutions

Protecting people and property for over 40 years and covering over 70 Million people in more than 100 countries worldwide, including more than 500 cities, counties and states in the U.S., as well as more than half of all California counties.
