

Genasys for Oil & Gas

Keep people safe and operations flowing

Facilitate **swift and precise notifications** to employees, contractors, and suppliers vital to operations for both critical alerts and day-to-day communications. In situations affecting internal operations or the supply chain, reduce the time from recognizing the event to notifying those affected. **Reach all stakeholders quickly** with key information and instructions to improve safety levels and business continuity. Mitigate workflow disruptions by accelerating responses to the unexpected, including critical events, machinery failures, and supply chain interruptions.

Employee Communications

Connect with your employees and ensure they get important alerts and information no matter where they are with comprehensive, multi-channel communication including email, voice calls, and SMS.

Facility-Wide Acoustic Alerts

Use Genasys Protect ACOUSTICS to broadcast live or pre-recorded voice messages over loud background noise and into buildings to notify & instruct everyone within your facilities through failsafe audible messaging.

Infrastructure Failure Alerts

Integrate external sensors to send alerts automatically when dangerous readings are detected. Set these alerts to broadcast to repair teams, people in nearby surroundings, or everyone within your facilities.

Intelligent Zones

Intelligent zones map out your facilities to easily target buildings, critical infrastructure, and sectors both onshore and offshore. Build, edit, and act upon an intuitive map to enhance decision making.

Mapping and Visualization

Eliminate confusion and enhance coordination by providing stakeholders access to a map displaying areas impacted by emergencies or other disruptions in real-time.

Emergency Response Collaboration

Establish a direct connection with public safety officials. Collaborate seamlessly with emergency response teams and regulatory agencies by sharing a common operating picture that facilitates decision-making.

Public Safety Awareness

In case of spills, leaks or other environmental risks, rapid response and targeted communication is crucial. Genasys Protect alerts all impacted stakeholders, ensuring their safety.

Secure Communications

Collaborate in a secure platform for day-to-day teamwork or to share urgent information. Communicate in a compliant environment, adhering to the strictest security and safety regulations.

Genasys Protect: The Communications Solution for Oil & Gas

Boost operational decision-making with comprehensive, real-time situational awareness tools. Streamline collaboration across remote sites and departments to expedite responses to critical incidents and emergencies. Safeguard key facilities, operational areas, and personnel with targeted multi-channel communications to broadcast essential alerts and safety instructions.

Genasys Protect ALERT:

- » Reach everyone you need to through targeted, multi-channel, mass notification
- » Communicate quickly through Quick Launch and sensor triggered alerts
- » Send automated alerts for infrastructure failures through sensor integrations
- » Integrate databases to keep updated contact details for critical communications

Genasys Protect ACOUSTICS:

- » Send clear and intelligible voice alerts across long distances, over loud background noise and into buildings
- » Broadcast pre-recorded and live voice messages to reach employees and visitors across large campuses and multiple buildings or facilities

Genasys Protect CONNECT:

- » Collaborate and share information through real-time two-way chat
- » Maintain compliance with the strictest security requirements and regulations
- » Collaborate internally, across regions, and with external organizations

Genasys Protect EVAC:

- » Target communication across large complexes and facilities with flexible zones
- » Establish a direct connection in planning with public safety professionals
- » Provide constant situational awareness for employees, customers and visitors
- » Improve planning and reaction time through crisis, oil rig evacuation or gas leak simulations
