

GENASYS PROTECT® MOBILE APP

KEEP YOUR COMMUNITY INFORMED WHEN IT MATTERS.

Genasys Protect is your partner in safety during emergencies, wherever you are. Communicate directly to your community through the app to share safety information and instructions during emergencies. Community members can keep track of critical information or updates sent from trusted sources. Additionally, people can choose to activate location services to receive alerts and safety instructions when they enter an area that is under threat. Users can even follow multiple locations for updates on places that matter to them.

Why the Genasys Protect App: Trusted Real-Time Updates:

Send immediate alerts to keep people informed about evolving emergencies, from a single source of truth.

Privacy:

Privacy is important. Alerts are based on neighborhood or zone-based data. Private data is not shared with any third party.

Live Evacuation Updates:

Let community members track current evacuation status, repopulation updates and more, using the interactive map.

Display Safe Spaces:

Help people quickly locate evacuation centers, shelters, resource centers, and animal shelters in the vicinity.

Point-of-Interest Notifications:

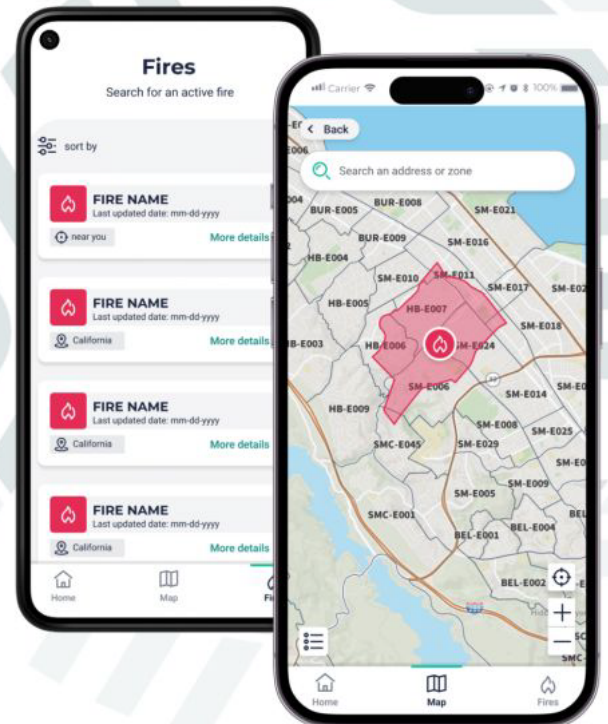

Minimize nuisance notifications meant for far-away locations so people receive emergency alerts specific to their area.

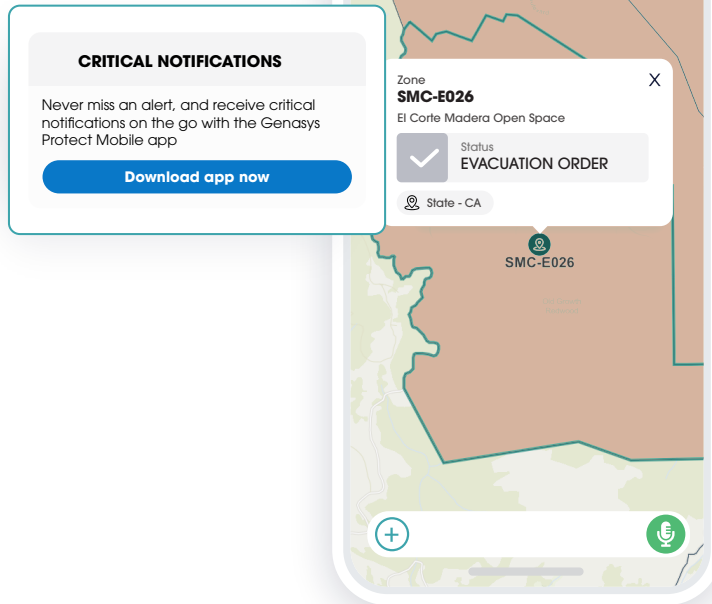

Alerts On the Move:

Users can enable location-sharing to receive alerts based on current location, increasing awareness of emergencies both at home and on-the-go.

Information Without Delay:

Send updates in an emergency quickly. With the app, users add an address or point of interest, and stay updated with actionable communication.

The Genasys Protect app streamlines important communications and any location-based updates to the community.

Privacy Matters:

Rest assured, Genasys Protect prioritizes the privacy of users. Specific addresses are not tracked. Instead, we notify based on neighborhood areas or specific zones to ensure users receive crucial alerts without compromising privacy. Only authorized officials can send alerts, minimizing nuisance alerts and ensuring users are informed precisely when it matters most. Genasys does not upload nor store personally identifiable information.

How to Get Started:

Download the mobile app to see how easy it is to stay informed. To see how it works, simply enter an address or drop a pin at a nearby location to receive public safety alerts.
