

World Cup 2026

Safety & Security Communication

Genasys Protect

*Respond to Emergencies, Keep Attendees Informed,
and Collaborate Across Organizations & Agencies*

With Genasys You're Ready

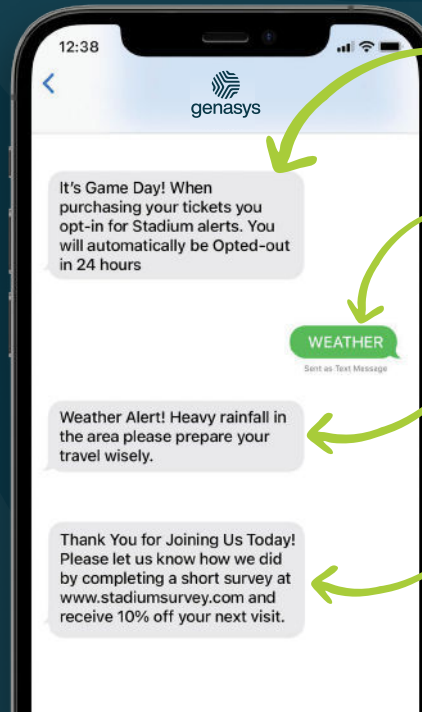

Genasys Protect enhances emergency response and public safety through fast, targeted communication that's critical for managing high stakes events like the **2026 FIFA World Cup**. With matches and fan gatherings spread across dozens of cities in the U.S., Canada, and Mexico, organizers must coordinate complex, multi-agency operations in real time.

Streamline event operations with interdepartmental and cross functional collaboration inside and outside your organization. Enable key staff to communicate and collaborate in real time. Create just in time operational chat rooms within seconds, supporting both day-to-day communications and immediate incident responses. Sync with public safety and communicate securely with attendees to efficiently distribute information.

Accuracy During an Incident

Information for fans, first responders, security teams, and staff forms that trigger immediate alerts for the public or response teams connected to stadium networks, even if they are not everyone when needed.

TO THE POINT

Give users a clear, customized greeting that explains exactly what alerts they'll receive.

USER FRIENDLY

Make it easy to subscribe with simple, customizable SMS keyword opt-ins.

FLEXIBLE ALERTS

Send general and emergency notifications exclusively to mobile users in targeted areas.

CUSTOMIZABLE KEYWORD

Use short-term keywords for specific events or emergencies, and long-term ones for ongoing alert groups.

Alerting Channels

Mobile Push Notification

Rapid and scalable delivery of notifications to mobile applications

Text Messaging

Delivery of text messages (SMS) to mobile devices and pagers

CAP Compliant

Interact with a wide array of external systems: sirens, TV, radio & digital displays

Indoor & Outdoor Notification

Audio notifications to Genasys Acoustics & LRAD public address (PA) systems

E-mail

Email delivery with attachments

XML Feeds

Output standard XML feeds (RSS, ATOM) integrating with other systems and websites

Voice Call

Delivery of voice telephony alerts to any land, VoIP, mobile phone

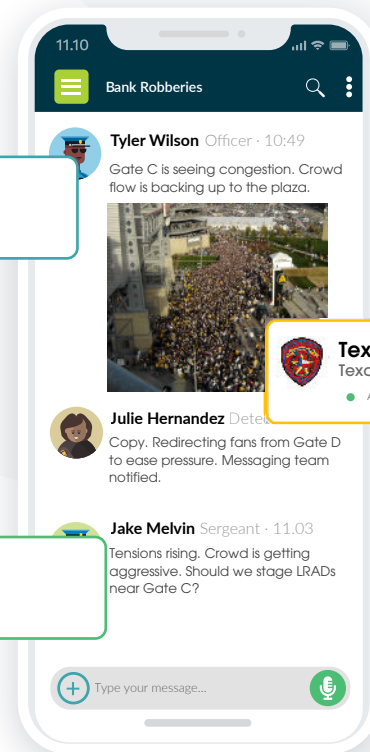

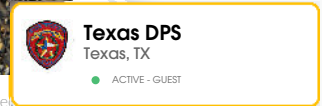

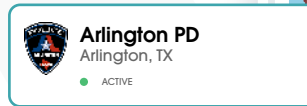

Social Networks

Distribution of alerts through Twitter and Facebook

Accelerate Collaboration & Coordination

Genasys Evertel enables secure, real-time communication across agencies and jurisdictions, critical for managing complex operations at high-profile events like the 2026 FIFA World Cup. Coordinate the expected, like fan traffic, security perimeters, and entry points, and respond fast to the unexpected, like crowd surges, rising tensions, or unauthorized protests. Instantly create chat rooms for law enforcement, fire, EMS, stadium ops, and local officials. As a cloud-based platform, Evertel deploys in hours and requires no hardware overhauls. All communication is encrypted to meet the strictest cybersecurity and privacy standards. Evertel also supports full audit trails to meet compliance standards and avoid legal risk from using unauthorized apps.

Police

Establish true interoperability with instant intelligence sharing and organized chatrooms

Fire & Rescue

Coordinate your efforts and get all the information you need before you're on scene

Paramedics

Address crisis events faster than ever with a stronger communications network

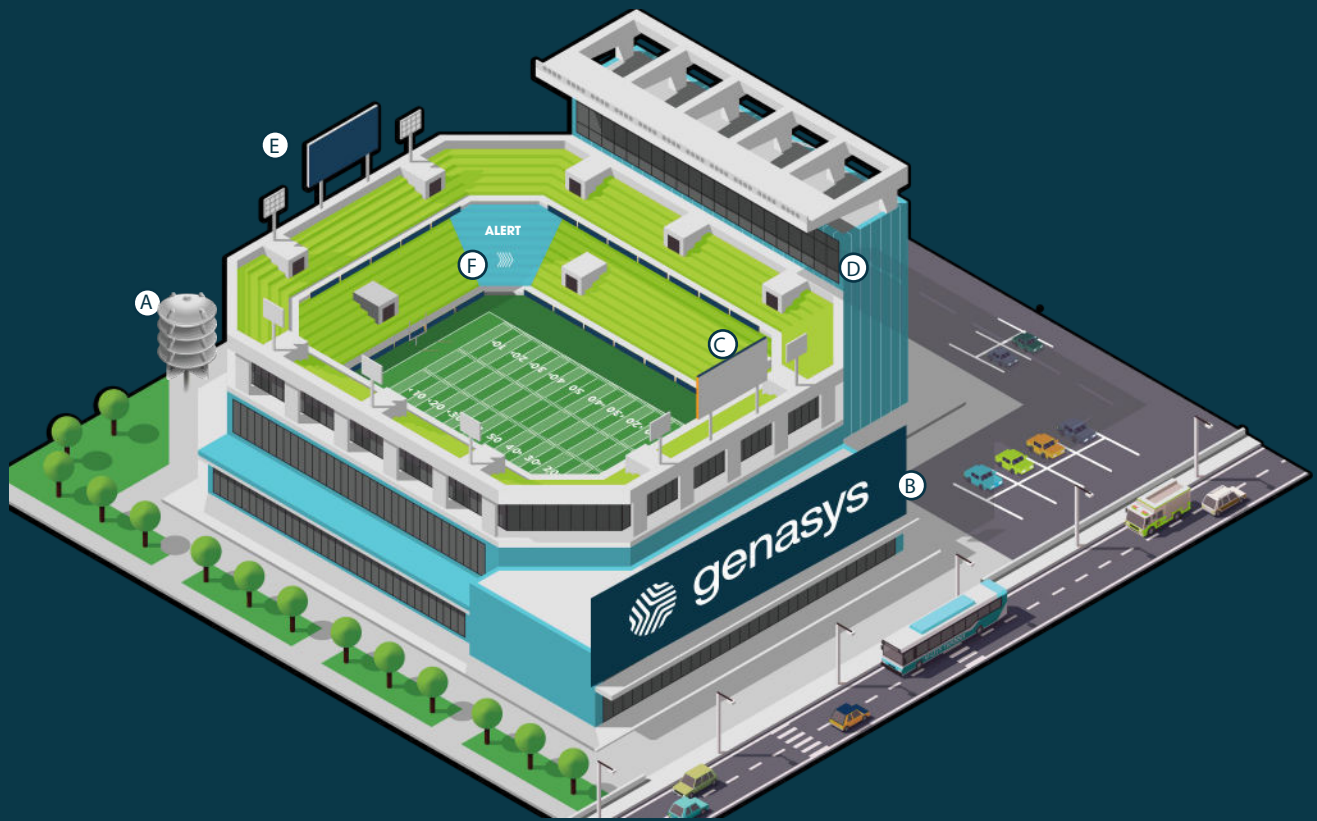

Local Authorities

Stay informed with immediate updates from your public safety agencies and first responders on-scene

Partner Agencies

Communicate instantly across agencies, both for crisis response and day-to-day collaboration
