

Genasys for Enterprise

Keep employees safe and informed during both day-to-day operations and situational emergencies.

Genasys Protect allows you to communicate with all stakeholders, enhance safety levels, and improve business continuity, keeping team members informed. Keep stakeholders safe through quick, targeted communications that reach individuals or large audiences during critical events or day-to-day operations. Whether managing a large campus with multiple buildings or working with a widely dispersed workforce, Genasys keeps everyone informed. Accelerate responses to unexpected interruptions in your operations to keep people safe, including during a crisis or emergency.

Targeted & Universal Messaging

Send notifications to individuals, groups, or targeted areas in different facilities. Use Wi-Fi auto-discovery to target areas or broadcast to everyone in the system during emergencies.

Infrastructure & Maintenance Alerts

When incidents threaten critical infrastructure, communicate to targeted, impacted areas so communities and customers are informed on outages and restoration

Employee Communications

Broadcast safety instructions through multiple channels such as SMS, email, digital signage and more. Establish direct, real-time chat rooms with individuals or teams for day-to-day communications.

Flexible Integrations

Maintain updated employee and client details through integrated databases. Sync external sensors around your facilities to send instant automated alerts during potentially dangerous situations.

Customer Communications

Genasys Protect serves as a trusted source of critical information for your community. Accelerate time-consuming communication procedures such as delinquent payment requests.

Mapping and Visualization

Communicate with the community in-real time for service disruptions or critical public incidents. Share information with public safety officials to aid and facilitate their response.

Public Safety Awareness

From boil water orders to hazardous materials incidents, emergencies endangering people require rapid communication. Genasys Protect targets communications to impacted customers and visitors.

Panic Buttons

The Genasys Protect mobile app provides a panic button for employees or customers to call for help. Additionally, QR codes set up around facilities trigger specific alerts when scanned.

"The Genasys platform allows us to scale. It allows us to not only provide services to our employees, but potential future services to fans, other businesses and groups in the area, as well as our key partners." – **Brian Shield, SVP/CTO, Boston Red Sox**

Genasys: The Communications Solution for Enterprise

Enhance day-to-day and emergency communications through a wide array of channels for both employees and customers. Empower your organization to react quickly to all disruptions, improving business continuity and resilience.

Genasys Protect:

- » Reach everyone you need to through targeted, multi-channel, mass notification
- » Communicate quickly through Quick Launch templates and automated alerts triggered by sensors
- » Accelerate time-consuming tasks such as delinquent payment requests
- » Facilitate employee management with personnel recall and automated shift assignment
- » Target communication across large complexes and facilities with flexible zones
- » Establish a direct connection in planning and responding to emergencies with public safety professionals
- » Provide constant situational awareness for employees, customers and visitors
- » Improve planning and reaction times through crisis, evacuation or lockdown simulations

Genasys Acoustics:

- » Broadcast clear and intelligible alerts across long distances, over loud background noise and into buildings
- » Broadcast pre-recorded and live voice messages to reach employees and visitors across large campuses, multiple buildings, or facilities

Genasys Evertel:

- » Communicate with individuals, teams, departments, or your entire organization sharing information, documents, multi-media, and working files through a real-time chat
- » Maintain compliance with the strictest security requirements and regulations
- » Collaborate internally, across regions, and with external organizations
