

Genasys for Federal Agencies

React swiftly to crises, streamline cross-agency collaboration, and ensure public safety

Genasys provides **fast, precisely targeted communications** and emergency management capabilities that greatly speed up response to crises, emergencies, and public safety concerns at home and abroad. Accelerate the flow of information among federal agencies and military forces. Reinforce protection for citizens, communities and military forces against crime, national security threats, natural disasters, and large-scale emergencies. Keep all stakeholders **informed and coordinated** throughout an event, broadcasting alerts or critical information.

Secure Communications

Access a secure space where professionals quickly form ad-hoc groups to support one-off incidents or maintain teams that stay in contact over the long run while adhering to the strictest security and safety regulations.

Incident Reporting and Documentation

Streamline incident reporting and documentation processes. Meet HIPAA, CJIS, and record retention requirements.

Cross-Agency Collaboration

Enable cross-agency collaboration through secure real-time day-to-day exchanges of information and a common operating picture for a unified response to large scale events.

Optimized Resource Allocation

Enhance decision-making and resource allocation through real-time, map-based, situational data including traffic monitoring, shelter locations, and critical facilities.

Targeted Multi-Channel Alerting

Send alerts to individuals, groups, or everyone in a geographic area through multiple channels including SMS, IPAWS, Genasys Acoustics, social media, voice calls, TV, radio, digital signage, and more.

Community Engagement

Extend selective information from your operations map to an intuitive webpage and mobile app to inform and direct the public before, during, and after events.

Risk Assessment and Planning

Plan effective emergency responses and evacuations by modelling "what if" scenarios. Stay a step ahead during ongoing events such as wildfires or floods through accurate disaster and evacuation simulations.

Long Range Acoustic Devices (LRAD)

Use LRAD to broadcast live or pre-recorded voice messages over loud background noise and into buildings to notify & instruct, determine intent, and establish large safety zones.

"It was very good to have the preplanning and pre-scripting ready to plug and play as an option. Also, being able to visualize the zones, impacted areas, evacuation details – it was easy for us to identify locations and push that into to our dispatch center, as well as social media and the public. Being able to preplan after the first New Year's Day flood was seamless." –

Lt. Nicholas Baldrige, Santa Cruz County Sheriff's Department

Genasys: The Communications Solution for Federal Agencies

Accelerate decision-making through in-depth, real-time situational awareness. Enhance cross-agency collaboration and communication to accelerate response times during large scale threats. Engage civilians with a self-service portal that allows them to stay informed to reduce panic and confusion during crises. Protect military installations with long range acoustic devices to broadcast alerts and critical information.

Genasys Acoustics & LRAD:

- » Broadcast clear and intelligible alerts across long distances, over loud background noise and into buildings
- » Broadcast pre-recorded and live voice messages with information and instructions
- » Maintain communication even when power or satellite connectivity is lost
- » Portable, fixed, and vehicle mounted systems for rugged, reliable, and easy to operate acoustic communication

Genasys Protect:

- » Reach everyone through targeted multi-channel mass notification
- » Target the right people quickly with precise pre-configured communication zones
- » Improve decision-making through situational awareness accessible on the map
- » Collaborate internally and across agencies through a common operating picture
- » Keep the public informed with real-time updates through the mobile app and public map
- » Communicate quickly using the fastest channels, templates, and Quick Launch alerts
- » Reduce reaction times with automated alerts triggered by weather data and sensors
- » Act from any location through a cloud-based platform

Genasys Evertel:

- » Collaborate and share information through real-time two-way chat, forming ad-hoc groups to support one-off incidents or maintain teams that stay in contact over the long run
- » Meet HIPA, CJIS, and the strictest public safety record retention requirements
- » Collaborate internally, across regions, and with external organizations through virtual EOCs

Genasys: Global Provider of Protective Communications Solutions

Protecting people and saving lives for over 40 years, Genasys covers more than 155 million people in all 50 states and in over 100 countries.
