Genasys Protect & FloodMapp

Zone-Based Evacuation for Flash Floods, Hurricanes, and Severe Weather

When storms approach, **Genasys EVAC and FloodMapp keep people safe from floods**, one of the deadliest natural disasters. Whether flash floods in summer storms, atmospheric rivers, or inland threats from hurricanes, rising water can destroy lives, and seconds matter to get people to safety.

Benefits

▸▸ **Real-Time, Dynamic Flood Models**

FloodMapp uses real-time gage data to model water levels across the area. Stop relying on outdated, static flood boundaries that give a false sense of security to the public.

▸▸ **Model, Simulate and Prepare**

With FloodMapp, model floods based on upcoming forecasts to get the most accurate picture of community danger, before it's too late.

▸▸ **All-Hazard Evacuation Readiness**

Build accurate evacuation zones for all hazards with EVAC, with custom flood zones based on FloodMapp models.

▸▸ **Accurate Zone-Based Alerting**

When flood threats increase, keep people in flood zones informed, using Genasys Protect to send targeted messages for when, and how, to evacuate safely.

"The Genasys / FloodMapp partnership brings together two proven technologies that empower government agencies, emergency managers, and first responders to make faster, more accurate decisions before and during flood events, ultimately saving lives and protecting communities." – **Craig Fugate, former FEMA Administrator**
