

Genasys Protect & First Due

Empower Seamless Incident Response and Communication During Emergencies

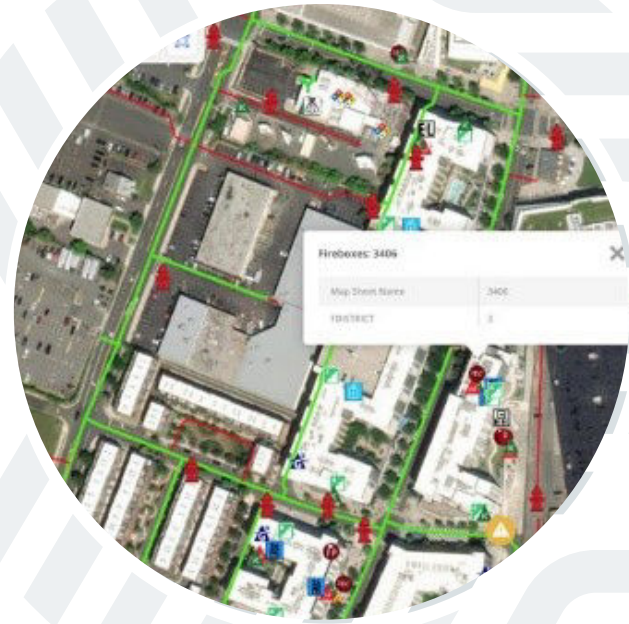

Tailored to streamline incident management and enhance operational efficiency, First Due serves as a comprehensive solution for fire departments and emergency medical services (EMS). Together with **Genasys ALERT and EVAC**, First Due solutions equip first responders with the tools they need to coordinate responses and ensure public safety quickly and effectively. Combine targeted, multi-channel communication and zone-based planning with the best in emergency management and response to keep people safe.

To-The Minute Geospatial Data

See your mission critical Genasys ArcGIS layers alongside all other information within the First Due platform, ensuring an informed and efficient response even in the toughest of scenarios.

Holistic Incident Command

Stay in control with powerful Incident Command software that lives within your core operational software. Bring important data to the forefront during the time of response from across your operation and easily consolidate records for streamlined after-action reporting.

All-in-one Fire and EMS Software

Consolidate incident reporting, fire prevention, pre-incident planning, scheduling & personnel management, asset & inventory, hydrants, training, community engagement, mobile response, and more into a single application with a sole login available anywhere on any device.

Fully Informed Response

Ensure critical data is readily available when it matters. Together, EVAC and ALERT allow responders to stay in control and effectively communicate, coordinate, and manage incidents from start to finish.

The relief of stress comes from knowing that the information is getting to the right people. We have a phenomenal crew of personnel who can accomplish anything when they have the right tools at their disposal, and First Due is one of those essential tools.” – **Curvin Wolfgang, Battalion Chief, York Area United Fire & Rescue**

About Genasys Protect

Genasys Protect helps first responders and emergency managers deliver accurate, actionable communication to the people who need it. Genasys Protect allows first responders and emergency managers to react quickly to unexpected events and emergencies with razor-sharp precision using flexible zones, predictive simulation, emergency warning and mass notification solutions for public safety, and critical event management for commercial enterprises and government agencies.

Community members can stay informed receive real-time alerts and notifications through multiple channels, including through the Genasys Protect website or mobile app. Genasys' solutions go beyond stand-alone mass notification or critical event management by creating an extensive suite of communication, preparedness, and analytics solutions to keep people, communities, and assets protected against the impacts of natural disasters, terrorism, civil unrest, and other dangerous situations
