

Benefits for Supervisors

Protect Your Badge & Your Career

If your team is using Signal, WhatsApp, Slack, or even Teams for work-related communication, you're exposing your agency to serious legal risk due to a lack of proper retention and oversight. Agencies are already being exposed and targeted under public and legal scrutiny.

At the same time, communication breakdowns create operational risk. Email slows you down and is rarely treated with urgency. Important information gets buried in clutter, spam, and long threads, often going unseen. Slow and unclear communication, alongside limited manpower and resources erode productivity.

Genasys Evertel is a secure, compliant communication platform built for law enforcement. It replaces fragmented tools with a single system for real-time, accountable communication, so your team can share critical information instantly, maintain full oversight, and operate it without legal risk.

Why Genasys Evertel

Defensibility and Compliance

- Protect your agency in every review with CJIS, FOIA, HIPAA compliance and full audit trails, accessible 24/7
- Prevent unauthorized access to sensitive information with a secure, U.S. government-only cloud, military-grade encryption, and controlled access

Speed

- Act quickly by pushing BOLOs, multimedia files, and intel instantly, from anywhere
- Eliminate delays by pulling internal and public records in seconds, not hours

Coordination

- Seamlessly align individuals, teams, and agencies with real-time communication within the US across local, private, state, and federal partners
- Maintain full operational oversight with visibility into who received and read messages and built in usage reporting

Win the Street
Cut the Waste
Own the Chaos

Get Results in the Field

With Evertel, supervisors can get critical information to the right people in seconds, ensuring everyone has what they need to act immediately. Clear and controlled communication reduces radio clutter, aligns teams and agencies, and eliminates delays caused by fragmented tools. You will respond faster, reduce confusion, and handle operations more efficiently allowing you to reduce overtime and cut unnecessary work.

Agency leaders can push out policies, protocol changes, and SOP updates in real time across the organization, with full visibility into who received and read each message. When misinformation starts to spread, leaders can respond immediately with clear, agency-wide communication from a single verified source of truth.

Ultimately, this leads to faster arrests, more cases closed, and less desk work, while maintaining full compliance to protect your agency from becoming the next headline.

When you're on Genasys Evertel, you're able to push out updates in real time. To me, that is the value proposition and is worth its weight in gold. It's very cost effective for our team and city. We're able to integrate federal, county and local assets and resources and get everybody in the same room, discuss what's important, and make decisions that commanders can rely on."

- Chris Cook, Police Chief, White Settlement, Texas
